Palazzoli
Leading Electrotechnology

Palazzoli

— excellence —
FROM ITALY

The globalisation process no longer allows for “Made in Italy” to be the only mark of differentiation against the competition which is increasingly being offered at lower and lower prices. Palazzoli export trade model is not to pursue price as the only criteria for valuation, but to emphasise the installation and maintenance characteristics as well as the performance and life span of the product through engineering excellence.

In the field of electromechanical industries, Palazzoli has consolidated its leading position in the electric market and has expanded its presence in the most important Countries with more than 100 local service facilities.

FOR 110 YEARS

In support of this direction Palazzoli concluded in 2014 two important acquisitions in the UK, Lewden Electrical and CGD based in London and Kilmarnock (Scotland) respectively.

The activity of the two Companies compliments the activity of Palazzoli which will benefit many of its chosen markets.

This major strategic evolution is dedicated towards maintaining the values and successes of the Companies history and to continue to implement innovative products to meet and anticipate the changing needs of the market and customers.

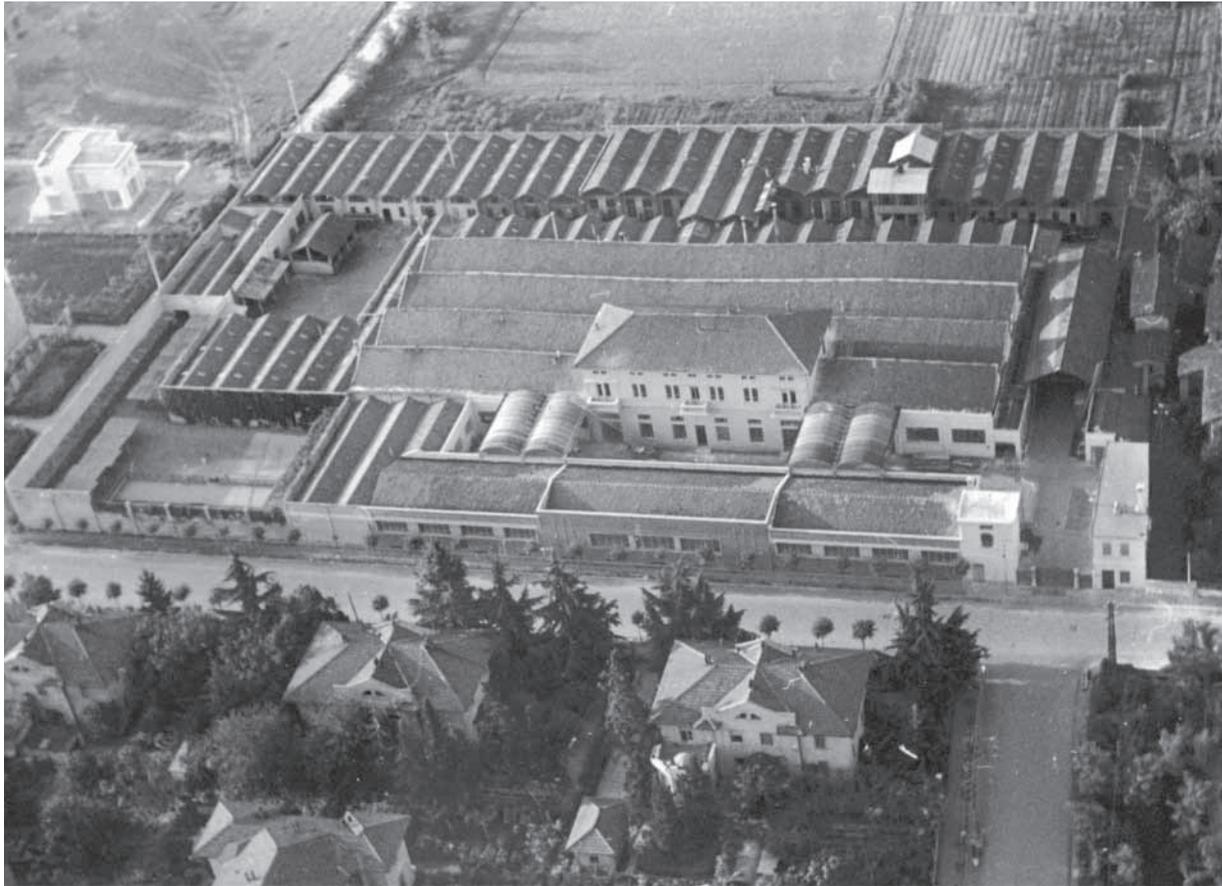

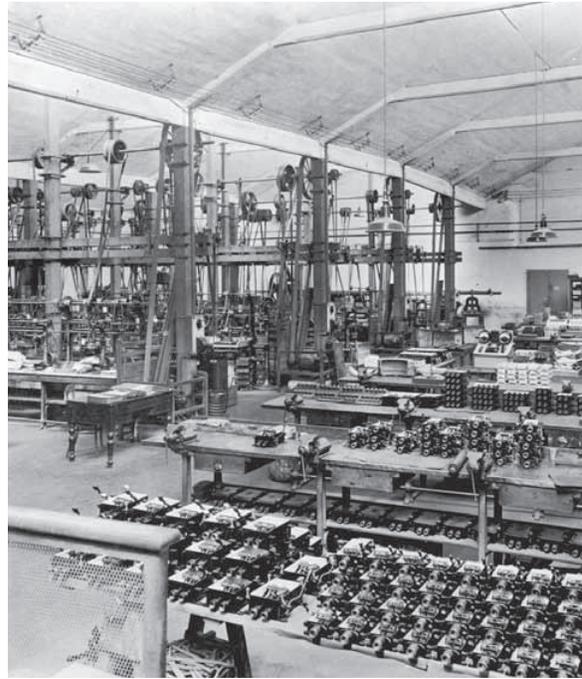

FOR OVER 110 YEARS IN THE ENERGY INDUSTRY

Between the end of 1800 and the beginning of 1900 Federico Palazzoli had given life to his own Company driven by his will and by ideas highly innovative for that age; the very same will and the very same ideas that continued later on feeding the achievement and development of the contemporary Palazzoli.

110 years have passed since the construction of the first plant destined for the production of electric material (1904) through the launch in the market of solutions for industrial, naval installation, automation and ATEX: Palazzoli's life represents an illustrious aspect of the Italian industrial history.

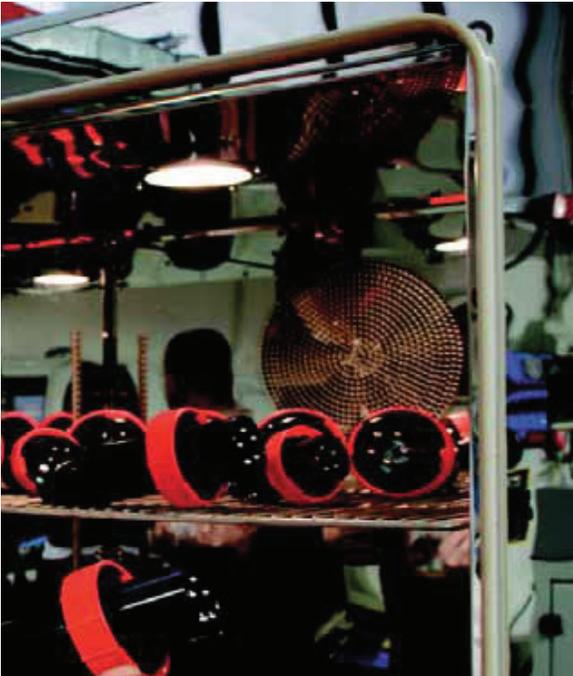

Palazzoli's mission is to supply excellent electric equipment for the domestic and international markets.

LEADING ELECTROTECHNOLOGY SYSTEMS

Palazzoli's success is grounded in the quality of its products, quality guaranteed by strict tests and controls through the entire production and marketing line. The values and the "savoir faire" embraced by each department in Palazzoli's structure, are translated into products that often are taken as "state-of-the-art" reference point, are properly certified by Notified Laboratories and stand out for the duration and perfection of their functions.

Palazzoli has already exceeded the Kyoto Protocol objectives for the year 2020 and further respects the safety and health of its customers, protects the environment and makes an aware use of natural resources. These are the ideals that power on and fuel each and every day the Palazzoli's motor offering, always, leading electrotechnology systems.

SUPERIOR PERFORMANCE AND SATISFACTION

Being oriented to success is the key element that ensures autonomy and profitable growth for the business. The reliability and faith placed by the customers in the performance of Palazzoli products is demonstrated by statements of esteem such as: "Palazzoli is safety, quality, but above all means professionalism, seriousness and respect to people; it is a great Company that offers high safety with its products" and further more: "..... by Palazzoli I have only received proofs, you are one of the most serious companies".

Customers' satisfaction advances the internal and external processes that aim at the continuous improvement strategy.

LEADERS OF THE FUTURE

Palazzoli is a dynamic Company that stands out in the market thanks to its commitment to innovation. In time Palazzoli exceeded the competition because of the quality of its products and the standard of its services, consolidating the appreciation, esteem and faith that goes along with the Company. Technological developments in the electrotechnical sector imposes on Palazzoli constant demands for research and design of products that achieve higher levels of performance and that meet the expectations of Installers and Specifiers. Every year Palazzoli invests huge resources of its turnover in research and development in order to build new products even to customer's specification.

THE ADVANTAGES

The body is fixed to the grip through integrated plastic elements.
This system, patented by Palazzoli, by avoiding use of metal components reduces risk of loosening or oxidation.

The special hooks with a particular inverse grip system is an effective way against ripping the cable from the plug, under strain, they oppose the same force on the cable in the opposite direction.

The Multimax plug grip has a cable gland automatic hold integrated system that prevents accidental loosening of the cable. The cable gland can be easily unblocked by raising the holding component.

The black colour series has been specially designed to bring all the Multimax benefits to the entertainment, TV and Film industry.

Multimax plugs and connectors are particularly indicated for sequential operations thanks to the quickness and ease of the wiring and mounting. In the IP44 version, they are equipped with a cable gland with radial clamping and an impossible to lose gasket that make them more safe than the standard sockets of the same category.

Plugs
with cable gland
for quick mounting
50-60Hz **IP44**

Conformity to standards	IEC/EN 60309-1 IEC/EN 60309-2
Body material	Technopolymer
Protection rating (IP as per IEC/EN 60529)	IP44 - IP67
Grip colour	RAL7042 (standard) RAL7021 (black)
Contacts material	Brass (IP44) Nickel brass (IP67)
Resistance to abnormal heat and fire ("Glow Wire" as per IEC/EN 60695-2-10)	850°C
Self-extinguishing grade (as per UL94)	V2
Resistance to impacts (IK rating as per IEC/EN 62262)	IK08
Rated current	16A - 32A - 63A
Rated voltage	50V - 690V
Rated frequency	0-500Hz
Rated insulation voltage	690V
Storage temperature	-30°C - +70°C
Operating temperature	-25°C - +50°C

Characteristics: all products are packed separately.

Conformity to standards	IEC/EN 60309-1 IEC/EN 60309-2
Body material	Technopolymer
Protection rating (IP as per IEC/EN 60529)	IP67 (multipliers) IP20 (adaptors)
Grip colour	RAL7042
Contacts material	Nickeled brass
Resistance to abnormal heat and fire ("Glow Wire" as per IEC/EN 60695-2-10)	850°C
Self-extinguishing grade (as per UL94)	V2
Resistance to impacts (IK rating as per IEC/EN 62262)	IK08
Rated current	16A - 32A
Rated voltage	230V-400V
Rated frequency	50-60Hz
Rated insulation voltage	690V
Storage temperature	-30°C - +70°C
Operating temperature	-25°C - +50°C

**Multipliers with 2 outlets and 16A industrial plug 50-60Hz IP67**

IP20

Rated current (A)	Rated voltage	Poles	Type	Palazzoli code	Pack Q.ty
16	250V	2P+⊕	S30	437152	10

Characteristics: cable entry hole Ø 11.5 mm. IP44 with code 590021

Technical accessories:

Suitable for supermarkets, hotels, schools, offices, hospitals, kitchens, trade fairs and production areas.

Simple to select
and easy to install

THE ADVANTAGES

The flange has been reinforced with strengthening ribs on the back in order to allow a better grip and resistance to mechanical stress. The IP rating is preserved over time.

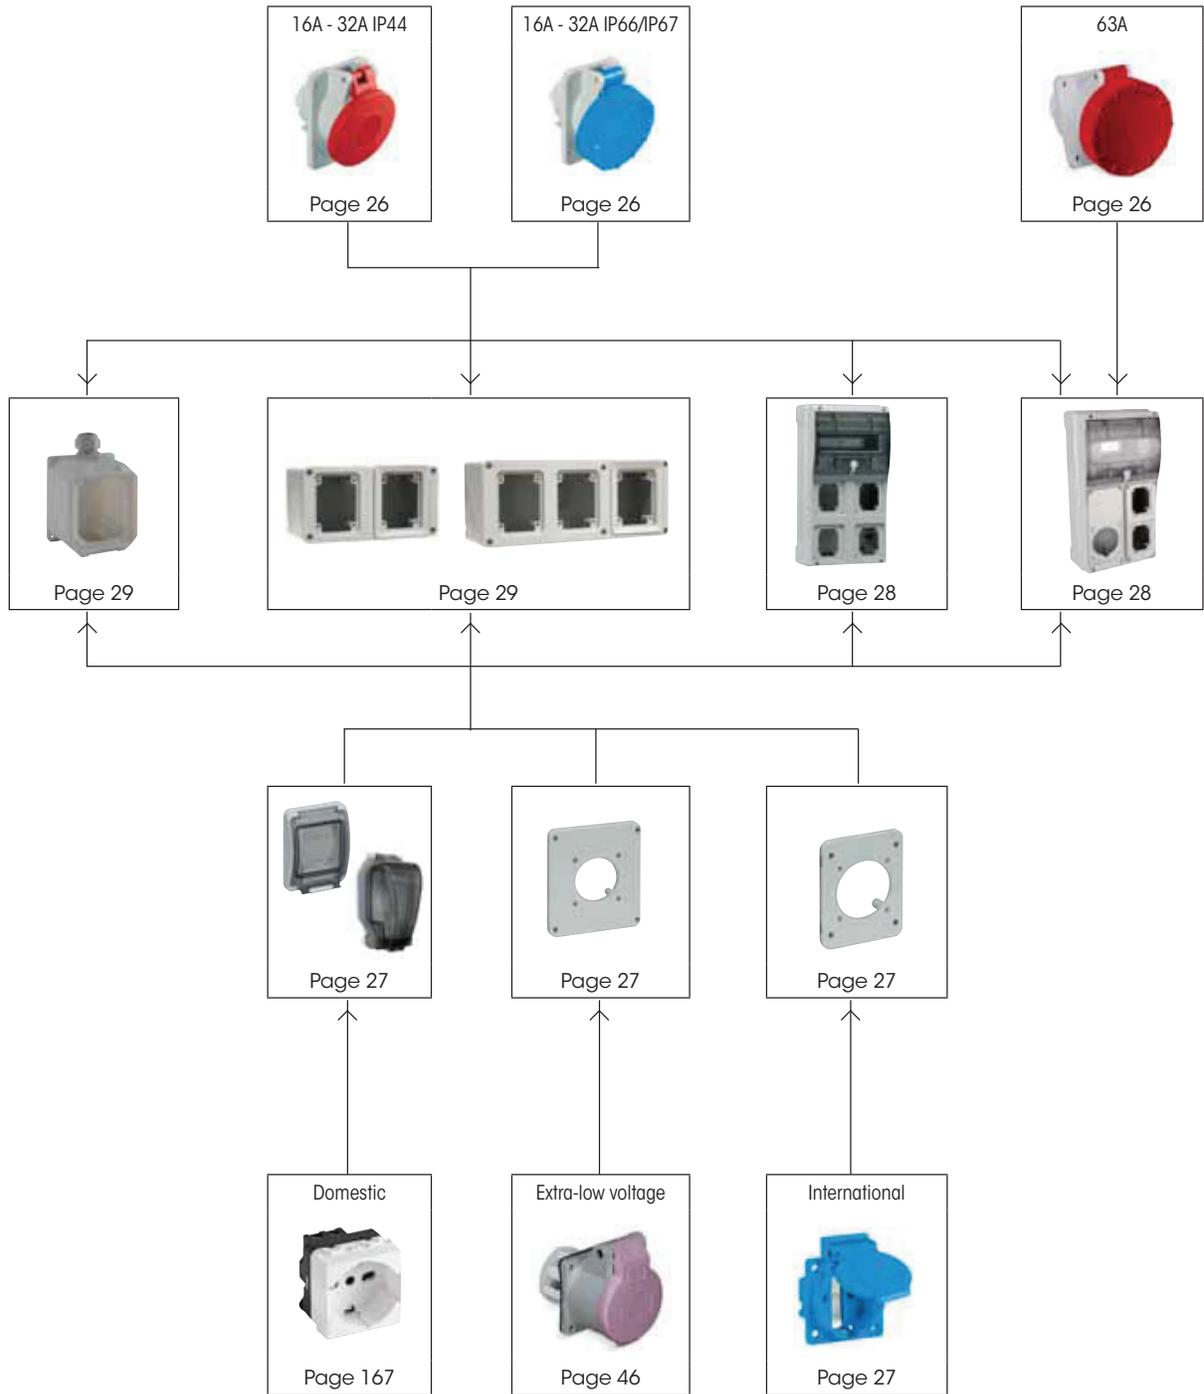

All industrial sockets can be equipped with an auxiliary contact that allows for remote signalling of plug connection for industrial automation applications, or in any situation where you may need an additional electrical protection.

topTER system gives you the possibility to complete your plant with domoTER domestic socket series that can be installed using a watertight cover, even with plug connected.

A wide range of boxes and boards provides the ideal solution for any requirement.

Easy Composer software allows for an easy combining of customized units.
It is available on www.palazzoli.com or directly from the QR Code.

topTER low voltage industrial sockets are a range of panel mounted moulded products for standard uses, from 16A to 63A, in compliance with the IEC/EN 60309-1 and IEC/EN 60309-2 standards, available in IP44 and IP66/IP67 versions.

The socket flange has been equipped with strengthening rib on the back and the IP66/IP67 socket sealing gasket is made of non-ageing elastomer.

The auxiliary contact signalling the plug insertion makes it ideal to be used in industrial automation applications with monitoring auxiliary circuits.

The range is completed by boxes up to 3 sockets, modular boards, and a series of wall mounted 15° or 90° angled sockets.

Suitable for frequent use with presence of impact, vibration or risk of crushing.

CEE series

High performance plugs and sockets

Reinforced thermoplastic
heavy duty

The thickened walls and the quality of the material protect from crushing

THE ADVANTAGES

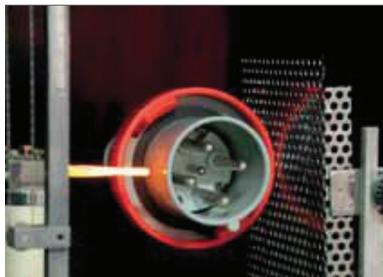

CEE series plugs and sockets are made of high performance insulating material resistant to accidental crushing, typical risks of areas such as mines or building sites.

63A and 125A plugs and sockets have a contact holder insert made of thermosetting (GRP) so they are suitable even for the most demanding environments.

The Easy Contact system consisting of a multi-lamellar crown in silver-plated copper facilitates connection and disconnection operations time after time and in the most demanding harsh environments.

All components resist at 850°C in the Glow Wire Test and allow to use CEE products in places with major fire hazard where the abnormal heat generated by extreme use conditions can damage less performing products.

CEE plugs and sockets are particularly indicated for mines and building sites thanks to their thick walls. The rounded contacts with easy insertion allow their frequent use even in harsh conditions.

Conformity to standards	IEC/EN 60309-1 IEC/EN 60309-2
Body material	Thickened wall technopolymer
Protection rating (IP as per IEC/EN 60529)	IP44 - IP67
Grip colour	RAL7042
Resistance to abnormal heat and fire ("Glow Wire" as per IEC/EN 60695-2-10)	850°C (grip) 850°C (16A/32A contact holder insert) 960°C (63A/125A contact holder insert)
Self-extinguishing grade (as per UL94)	V2 (grip) V2 (16A/32A contact holder insert) V0 (63A/125A contact holder insert)
Resistance to impacts (IK rating as per IEC/EN 62262)	IK08
Rated current	16A - 32A - 63A - 125A
Rated voltage	50V - 690V
Rated frequency	0-500Hz
Rated insulation voltage	690V
Storage temperature	-30°C - +70°C
Operating temperature	-25°C - +50°C

EASY CONTACT

The **multi-lamellar crown** in silver plated copper guarantees:

- wider pin-plug contact surface;
- easy removal of the plugs from the sockets;
- perfect cleaning of the pin;
- hard-wearing, long-lasting electrical contact

**Panel mounted sockets
straight, for heavy duty
50-60Hz IP44**

EASY CONTACT

The **multi-lamellar crown** in silver plated copper guarantees:

- wider pin-plug contact surface;
- easy removal of the plugs from the sockets;
- perfect cleaning of the pin;
- hard-wearing, long-lasting electrical contact

Suitable for powering heavy loads in extreme environments such as industrial ports, mines, hangars, tunnels and railways.

Reliability and safety for heavy loads

THE ADVANTAGES

The socket with electrical interlock guarantees maximum safety during connection and disconnection operations, by eliminating power to the connection.

The particular shape of the plug and receptacle allows for easy coupling which is also facilitated by the multi-lamellar Easy Contact technology.

Standard 250A versions are equipped with screw terminals that grant maximum versatility.

The wall mounted socket is supplied with a customizable blind entry flange.

ALUMAX series low voltage connections are a range of mobile or flush mounted products in aluminium alloy for heavy duty uses, from 250A to 400A, with IP67 protection rating, which can be used with voltage up to 1000V. The body in aluminium alloy is treated with passivation to improve the resistance to chemical agents. The coupling system of plug and receptacle is equipped with the technology of Easy Contact to allow the best performance in time for the electric contact and to facilitate connection and disconnection operations. Each connection is equipped with a double pilot contact.

Conformity to standards	IEC/EN 60309-1
Material	Aluminium alloy
Surface treatment	Anti-corrosion passivation
Protection rating (IP as per IEC/EN 60529)	IP67
Colour	Natural
Resistance to impacts (IK rating as per IEC/EN 62262)	IK10
Rated current	250A - 400A
Rated voltage	Fino a 1000V
Rated frequency	50-60Hz
Rated insulation voltage	3.3 KV
Mobile connection cable entry diameter	42mm ÷ 62mm
Contact clamping range	50mm² ÷ 70mm²
Pilot contacts	2
Pilot contact sections	10mm² (3P+÷) 6mm² (3P+N+÷)
Operating temperature	-25°C - +50°C

Resistance to chemical agents

WATER	SALINE ATMOSPHERES	ACIDS		CHEMICAL BASES		SOLVENTS			
		CONCENTRATED	DILUTED	CONCENTRATED	DILUTED	ALCOHOL	ACETONE	PERCHLOROETHYLENE	BENZENE
↑	↑	↓	→	→	↑	↑	↑	↑	↑
OILS		FATS		AMMONIA	OXIDIZERS	INORGANIC SALTS	GASOLINE	DETERGENTS	U.V. RAYS
MINERAL	VEGETABLE	ANIMAL	SYNTETHIC						
↑	↑	↑	↑	↑	→	↑	↑	↑	↑

Legend: ↑ high resistance → partial resistance ↓ low resistance
