Suitable for food industries, extractor hoods, chemical industries, mines and environments with cutting oil presence.

No welded joints means no oxidation

THE ADVANTAGES

The special reinforced gasket guarantees the IP66 protection rating in all the range.

The new glass diffuser without metallic border offers a wider transparent surface for an even better photometric performance.

The ultra-bright aluminium reflector ensures optimum efficacy of the luminous flux and therefore an extremely uniform distribution .

The non-deformable structure makes RINO suitable to be installed even when vibrations are present.

The range of RINO lighting fixtures is manufactured with the highest quality standards guaranteeing reliability and best performances, such as the body which is cold-drawn in a single piece and with a high photometric output.

Conformity to standards	IEC/EN 60598-1 IEC/EN 60598-2-1
Body material	Stainless steel AISI 304 Painted zinc steel
Diffuser material	Temperate glass Polycarbonate
Painting	Non-toxic polyester resistant to weather conditions and UV rays
Protection rating (IP as per IEC/EN 60529)	IP66
Colour	RAL9003 (painted zinc steel version)
Resistance to impacts (IK rating as per IEC/EN 62262)	IK09
Insulation class	I
Fuse type	Cylindrical 5x20
Lampholder	G13 T8 / G5 T5
Rated voltage	230V
Rated frequency	0-50-60Hz (electronic) 50Hz (electromagnetic)
Max cable section	2,5 mm²
Entry cable diameter	7-14 mm
Emergency battery lifetime	1h
Storage temperature	-40°C - +70°C
Operating temperature	-25°C - +50°C

RINO LED is the new watertight lighting fixture series made of steel and glass including LED technology to illuminate internal or external areas. The new light-scattering system ensures more than 35% energy saving if compared with the same luminous flux of a T8 fluorescent lamp. Visual comfort is guaranteed by the anti-glare diffuser. We recommend to install these devices in those areas where it is important to combine steel body resistance together with energy saving.

RESISTANT
Thanks to the stainless steel AISI 304

CRUSHPROOF
Thanks to the single body

50.000 HOURS OF LIGHT
Thanks to the new LED technology

Conformity to standards	IEC/EN 60598-1 IEC/EN 60598-2-1 IEC/EN 62031 IEC/EN 62384 IEC/EN 61347-2-13 IEC/EN 62471
Body material	Stainless steel AISI 304 Painted zinc steel
Diffuser material	Temperate glass
Painting	Non-toxic polyester resistant to weather conditions and UV rays
Protection rating (IP as per IEC/EN 60529)	IP66
Colour	RAL9003 (painted zinc steel version)
Resistance to impacts (IK rating as per IEC/EN 62262)	IK09
Colour temperature	4000K
Insulation class	I
Rated voltage	230V
Rated frequency	50Hz
Max cable section	2,5 mm²
Entry cable diameter	7-14 mm
Storage temperature	-40°C - +70°C
Operating temperature	-15°C - +50°C

RINO-LED PHOTOMETRIC

RINO series round and oval bulkhead lamps are lighting fixtures manufactured with high quality standards for industrial products. The diffuser in anti-impact ribbed glass, lamp holder in porcelain, surface treatment of passivation with fluoro-zirconium and hot polymerized polyester painting guarantees resistance of the product in any areas. We recommend to install these fixtures in those places, such as arcades, electrical substations, cold rooms and in any restricted space where you may need a long-term resistant lighting fixture.

HIGH RESISTANCE
Thanks to the continuous use at -40°C

GUARANTEED PROTECTION
Thanks to the external predisposition for fixing

MAXIMUM SECURITY
Thanks to the protective cages

Conformity to standards	IEC/EN 60598-1 IEC/EN 60598-2-1
Material	Aluminium alloy (body) Prismatic tempered glass (diffuser)
Surface treatment	Passivation with fluoro-zirconium
Painting	Hot polymerized non-toxic polyester
Protection rating (IP as per IEC/EN 60529)	IP65
Colour	RAL7035 (body)
Resistance to impacts (IK rating as per IEC/EN 62262)	IK10
Insulation class	I
Lampholder	E27 type in porcelain G23 type in technopolymer
Rated voltage	230V
Rated frequency	50-60Hz
Max cable section	2,5 mm²
Entry cable diameter	5 - 13 mm.
Storage temperature	-50°C - +80°C
Operating temperature	-40°C - +70°C

60	E27	1	812060	5
75	E27	1	812100	5
100	E27	1	812200	2

Equipment included: including globe-holder ring, gasket, E27 safety lamp holder, and cable gland.

Characteristics: with M20 threaded hole for pendant conduit. Lamp holder in porcelain.

Cylindrical lighting fixtures
in aluminium alloy
for angled wall mounting
250V IP65

M20 cable gland
technopolymer

Nautilux combines the qualities of using high quality traditional materials with the fixture design associated with maritime applications, ships, sailing crafts, ports and marinas. The use of high quality brass and etched glass, with components which together will resist tough waterside environments associated with its traditional applications. Suited to both outdoor and indoor applications, Nautilux could be used to enhance the architecture of many spaces including theatres, restaurants, clubs, and retail as well as the traditional marine applications.

GRACEFUL
Thanks to polished brass and etched glass

RELIABILITY
Thanks to the elastomer gaskets and stainless steel screws

IT CAN BE INSTALLED EVERYWHERE
Thanks to noble materials and studied finishing

Conformity to standards	IEC/EN 60598-1 IEC/EN 60598-2-1
Material	Polished brass (body) Etched glass (diffuser)
Protection rating (IP as per IEC/EN 60529)	IP44 - IP66
Resistance to impacts (IK rating as per IEC/EN 62262)	IK10 (body)
Insulation class	I
Lampholder	E27 type in porcelain
Rated voltage	230V
Rated frequency	50Hz
Max cable section	2,5 mm²
Storage temperature	-50°C - +80°C
Operating temperature	-40°C - +70°C
